

I'm not robot!

The Necromancer's Manual.

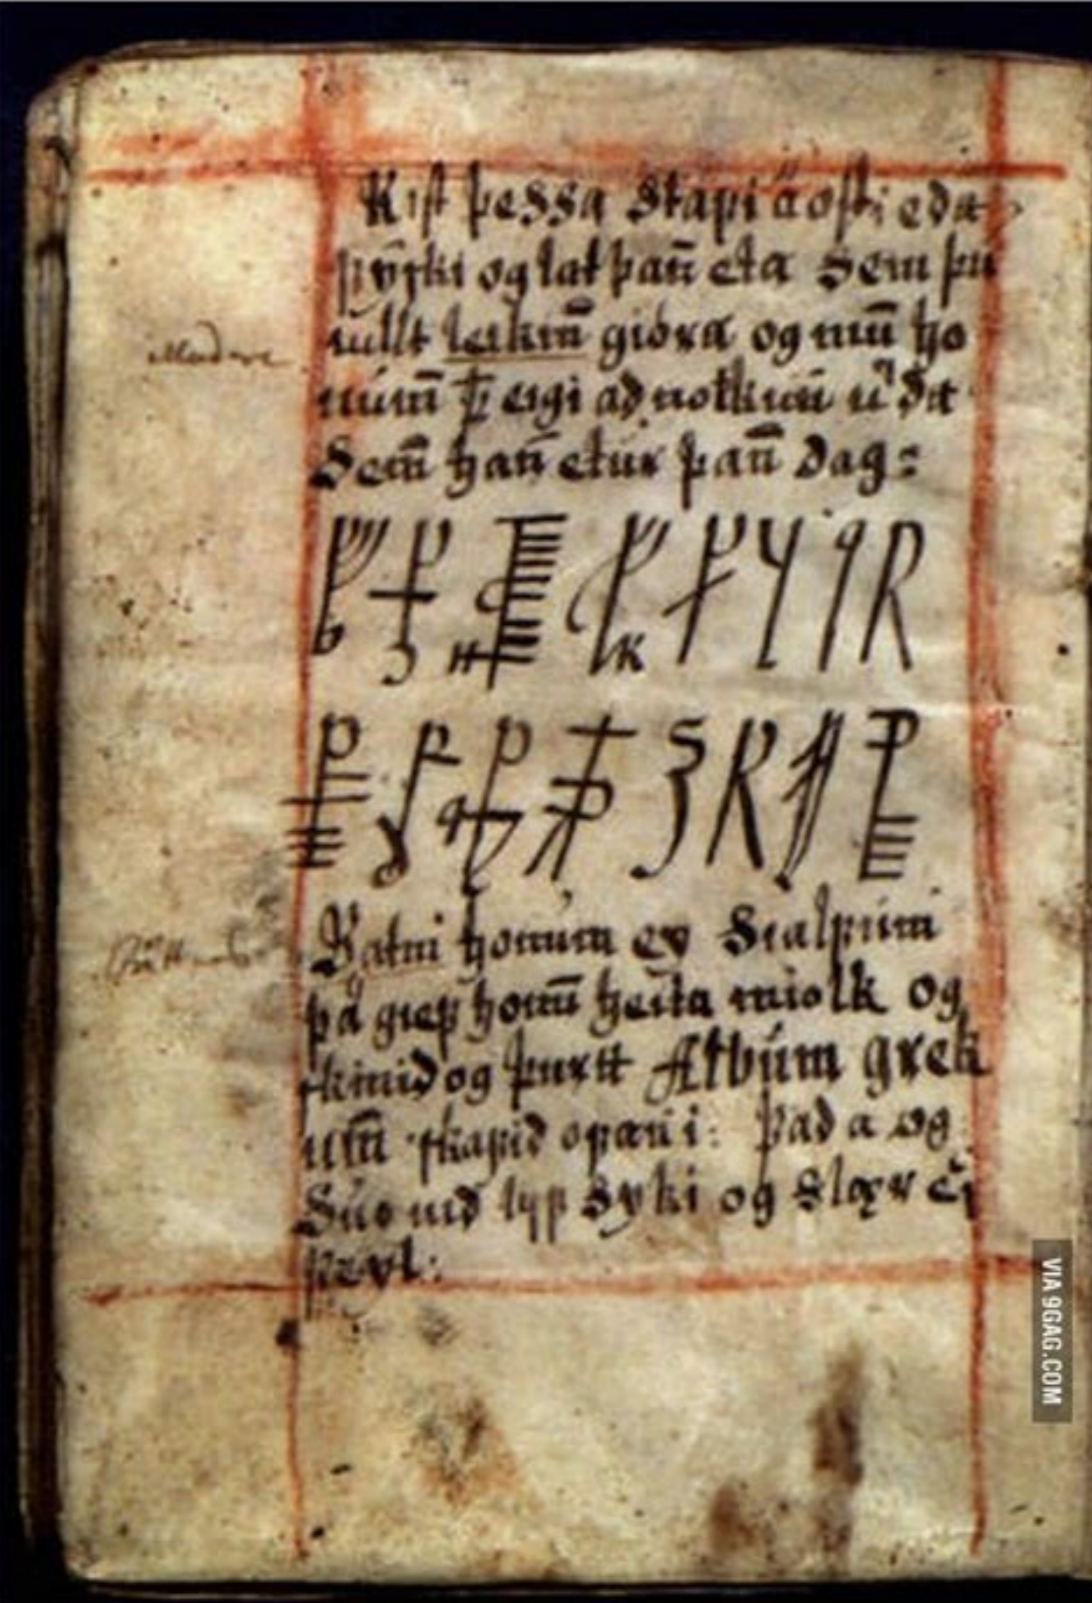

"The Munich Manual of Demonic Magic" (more affectionately as "The Necromancer's Manual") is filled with spells that can make enemies see armies that aren't there. It's also kind of a freaky monster cookbook, and shows its readers how to sacrifice mythological creatures like this beauty.

The Picatrix.

This 11th century grimoire is the largest at 400 pages. It's also decidedly the grossest. Almost every concoction this book asks you to drink will help you achieve immense power, but the catch is you have to mix poop into it. Or blood. Or semen. Worth it?

Galdrabok.

This Icelandic grimoire features spells like the others, but also runes carved onto ornaments and worn on the body. The power these runes inflict range anywhere from killing your enemies' war animals to making your enemies (and I quote from the Galdrabok itself) "plague thy belly with great farting ... may thy farting never stop."
